# Caravan Salon 2018: Pleasant temperatures in the camper van with Eberspaecher climate control solutions

- **Low-noise heating with the new generation of Airtronic 2 air heaters**
- **EasyStart Pro intuitive operating element**
- **Bike show and autograph opportunity with Danny MacAskill**

*Esslingen, 4 July 2018* **– Comfort on the road at any time of year – the heating and cooling solutions from Eberspaecher make it a pleasure to go camping at any time of the year. The climate control specialist will be presenting its latest air and water heaters in hall 13, stand A 11 at the Caravan Salon in Duesseldorf from 24 August to 2 September. Further highlights will be the shows by biking professional Danny MacAskill, including an autograph opportunity afterwards on the first weekend of the show.**

On the road with a recreational vehicle the whole year round – a growing trend. The **Airtronic M2 Recreational** – one of the three new models from the next generation of Airtronic air heaters – maintains a pleasant temperature in the vehicle at all times. Specially developed for motorhomes, the Airtronic M2 Recreational delivers a higher air flow rate. This makes it particularly ideal for installations with long air flow systems. The smallest version, the **Airtronic S2 Commercial**, requires little space and can also be integrated flexibly as an additional heater. The Airtronic family has a long service life of over 5,000 hours thanks to its brushless motor. With its integrated altitude sensor it is suitable for traveling both to coastal and mountainous regions: The sensor optimizes the burner operation and enables automatic adjustment up to an altitude of 3,000 meters. Thanks to stepless heat output control it is efficient in

operation and, with the acoustically optimized metering pump, quiet at the same time. So campers can be sure of a peaceful night's sleep. The **Hydronic S3 Economy** offers RV owners a water heater with more efficient heat output than ever while being compact in size at the same time. In combination with the new EasyStart Pro operating element, it can be used at altitudes over 1,500 meters as well.

**Intuitive operation of the pre-heater with EasyStart Pro**

With the permanently installed **EasyStart Pro** operating element, RV owners can control up to two heaters simultaneously. A timer function allows the desired starting time and heating duration to be set in advance. An integrated temperature sensor ensures optimum temperature control. The current status is shown by a display and a colored LED ring around the control knob. This means that you can see at a glance whether heating or ventilation mode is currently active. Of course, the pre-heaters from Eberspaecher can be controlled not just via the EasyStart Pro but via EasyStart Web or classical remote control as well.

**Pleasantly cool even in the heat of summer**

On hot summer days the stationary cooling systems such as the **Ebercool Holiday G3.5** or the portable **Ebercool Portable** solution provide a pleasant climate in the RV. The cooling system can be operated both while driving and independently on a stationary basis. Since the cool air is generated by evaporation, the system is also suitable for dog owners and people who are sensitive to conventional air-conditioning.

***Bike show and autograph opportunity with Danny MacAskill***

*Fans can meet Eberspaecher's brand ambassador and enthusiastic owner of a recreational vehicle Danny MacAskill on 25 and 26 August in hall 13, stand A 11 (at 3 p.m. on each day). To see his bike tricks live, come along to the grounds at the show at 1.30 p.m. or 4.30 p.m. on either day. More about the biking professional and YouTube star at* www.dannymacaskill.co.uk.
